HEATING OIL WT 68 0002-000274

Description of the

TIPP-OIL Heating Oil WT 68 is a mineral oil based heat transfer oil which is suitable for the industrial operation of closed heat transfer systems. Its high specific thermal conductivity, combined with high thermal stability, as well as high

Resistance to oxidation are just some of the numerous quality features that make this product an excellent heat transfer oil.

Instructions for use

TIPP-OIL Heating Oil WT 68 is particularly suitable for use in closed heating systems. Direct contact of the oil with the ambient air is to be avoided, as this can lead to ageing of the oil.

We recommend cleaning the entire heat transfer system before each new filling. We recommend cleaning the entire heat transfer system before each new filling. A system that has not been cleaned for maintenance does not achieve optimum efficiency.

Quality Classification

Specifications have been tried and tested in practice in units with filling regulations: -

Properties

Very stable and excellent viscosity behaviour

High specific thermal conductivity

High oxidation stability
