product certificate TIP-OIL CGLP ISO 150

Description of the

Very good stick-slip behaviour

adherence

Good corrosion protection properties, no rust and stain formation

Resistance to aqueous metalworking media

Good demulsifying behaviour

TIPP-OIL CGLP ISO 150 is a mineral CLGP bed track oil.

It is characterised by special lubricating and sliding properties and high adhesion.

It is therefore particularly suitable for the lubrication of slideways and bed tracks.

TIPP-OIL CGLP ISO 150 is formulated with mineral base oils and contains additives and

Corrosion inhibitors to prevent the formation of rust and stains on slideways and bed tracks.

It is largely resistant to aqueous metalworking media such as drilling, cutting and grinding emulsions or solutions. The sliding film is not washed off or washed away by these media.

Instructions for use

TIPP-OIL CGLP ISO 150 is suitable for all types of lubrication such as pressure, circulation and central lubrication, for splash and pressure lubrication as well as for manual lubrication by means of an oil can.

It is also suitable for bearing and gear lubrication.
